IMPORTANT CONDITIONS AND LIMITATIONS

This service may not be available to make emergency calls (Triple Zero, '000' calls). While every effort is made to ensure that emergency calls are connected, you should ensure you have access to a landline or mobile telephone service to dial Triple Zero in emergencies.

This service may not provide accurate location data to emergency call operators. FaktorTel BizVOIP - 20 Line Plan can be accessed from anywhere with an Internet connection and as such may be used at addresses which are different to the address registered with the IPND Number Database. Emergency services rely on the IPND to obtain location information. We will make every effort to ensure the IPND database is kept up to date with the most recent address you provide to us.

For security reasons, FaktorTel by default only allows calls to the most popular international destinations. Calling to other international destinations can be enabled on request. We do not charge to enable calling to non-standard international destinations.

While some calls are untimed for billing purposes, for security reasons all calls have a 2 hour connection limit and will automatically disconnect after 2 hours.

This service excludes support over the telephone. All support for FaktorTel BizVOIP - 20 Line Plan is via email.
